Ordering your 3D printing consumables just got a whole lot easier
Introducing Shop 3D Systems

We are excited to introduce Shop 3D Systems, a new e-commerce system for 3D Systems' customers in the US, UK and EU to directly submit and track material and consumable orders. Purchase 3D printing supplies, view order history, track orders and reorder.

Shop materials and consumables

1. Create a 3D Systems customer support account
2. Place an order on shop.3dsystems.com
3. From your account, you can view your tracking information
4. Reorder from your order history

Simply use your 3D Systems Customer Support account and click on the shop button once logged in and follow the prompts to link your account. If you do not have an account, you can register on our 3D Systems Customer Support Center using your printer serial number to complete the registration. Orders are processed the same day when ordered during normal business hours. Shipping methods can be selected at checkout and prices are calculated based on the total weight and shipping zone. If you prefer to use your freight account, you will need to place orders directly with your local 3D Systems Order Management team.

For more information, contact your local Order Management team or email 3dsalesforce@3dsystems.com.
